

Job Title: Mechanical Supervisor

Location: Prince George, BC (with travel to project sites as required)

Job Type: Full Time/Part Time

Company: Cobalt Group

Salary: \$65-78 per hour

WORKING FOR COBALT GROUP

Cobalt Group is the industrial contractor of choice; we set the benchmark for service excellence. Safety is an integral part of our company's operating philosophy and is a key component of our overall success. We are committed to the safety and well-being of our employees.

JOB DESCRIPTION:

We are seeking a highly skilled and motivated **Mechanical Supervisor** to lead mechanical maintenance and installation projects across multiple sites. This position is based in Prince George, BC, and requires regular travel to various project sites across Western Canada. The successful candidate will supervise a team of millwrights, ensuring safe, efficient, and high-quality mechanical work both locally and on the road.

RESPONSIBILITIES:

- Supervise and coordinate mechanical maintenance and installation activities at various project locations.
- Lead and mentor a team of millwrights, ensuring adherence to safety and quality standards.
- Plan and execute preventive and corrective maintenance schedules.
- Oversee the installation, alignment, and repair of pumps, conveyors, gearboxes, and other industrial machinery.
- Travel to project sites to support equipment installation, commissioning, and troubleshooting.
- Collaborate with engineering, operations, and project management teams to meet project deadlines and performance targets.
- Maintain accurate documentation of maintenance activities, equipment history, and inventory.

- Promote a strong safety culture and ensure compliance with all health, safety, and environmental regulations.

QUALIFICATIONS:

- **Certification:** Red Seal Millwright (or equivalent) required
- **Experience:**
 - Minimum 10 years of experience as a millwright
 - Preferred minimum 2 years in a supervisory position or leadership role
 - Mandatory experience in the pulp and paper industry
 - Must have experience working in the following fiberline areas: machine room, bleach plants, digesters and chip handling.
 - Must have knowledge of power & recovery and recaust.
- **Skills:**
 - Strong mechanical troubleshooting and problem-solving skills
 - Proficient in reading drawings, blueprints and technical manuals
 - Excellent leadership, communication, and organization abilities
 - Strong interpersonal skills with the ability to manage client relationships effectively
- **Other Requirement:**
 - Valid driver's license and ability to travel project sites across Western Canada
- **Additional Information:**
 - **Relocation assistance** may be offered to qualified candidates
 - We are actively hiring for both **full-time** and **part-time** supervisory roles
 - **Subcontractor rate** available, subject to eligibility screening

HOW TO APPLY:

Your resume should clearly identify how you have the knowledge, skills, and experience to be successful in this position. Submit your resume to resumes@cobalt-group.ca with the job title in the subject line. Thank you for your interest in working with Cobalt Group.
